Second Iteration Demo

<u>Team Name:</u>
TeamOfFour

<u>Team Member:</u>
Jialin Zhao (jz2862)
Linlin Tian (lt2667)
Xi Chen (xc2403)
Zhou Xingchen (xz2721)

<u>Time and demo</u>: Dec. 3rd (Dec. 4th).

<u>Challenges</u>: We forget to submit one line of code, which will store the price for dish in the data entry. When adding a dish during demo, the dish name was stored but the price was not stored and caused an error when we read the dishes list of the menu.

<u>user cases</u>

1. Registration
2. Menu Management for Restaurant manager (NEW)
3. Shopping Cart for Customers (NEW)
4. Location using 3rd party API (Google Map) (NEW)

<u>CI mechanisms</u>

We are using coverage to test the coverage of unit tests of our code.

coverage run --source="python file" "test"
coverage report -m

Where we tested YourChef.userHelper, YourChef.registration, YourChef.gmHelper, and YourChef.menu
